Applicant(s)

HATCH, RICHARD

Examiner

Sheila B. Smith

Art Unit

2681

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 December 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-12 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) 1-12 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Kransmo et al. (U. S. Patent Publication Number 2003/0016639).

Regarding claim 1, Kransmo et al. discloses essentially all the claimed invention as set forth in the instant application, further Kransmo et al. discloses a telecommunications system and method for delivery of short message service messages to a mobile terminal in data mode, in addition Kransmo et al. discloses a method of operating a mobile phone network, the method comprising the steps of: recording an email address in association with a mobile phone number (which reads on the IMSI as disclosed in paragraph [0031]); receiving a text message (which reads on paragraph [0028]) addressed to said number (receiving a message addressed to said number, however, it is an inherent feature that in order to receive a call it would have to had been sent to the phone number associated with the unit); converting the text message into an email addressed to said email address (which reads on paragraph [0037]); and sending the email (which reads on paragraph [0037]).

Regarding claim 2, Kransmo et al. discloses everything claimed, as applied above (see claim 1) additionally, Kransmo et al. discloses receiving a text message redirect instruction associated with said mobile phone number (which reads on paragraph [0009]).

Regarding claim 3, Kransmo et al. discloses everything claimed, as applied above (see claim 2) additionally, Kransmo et al. discloses said redirect instruction is received from a subscriber in advance of said text message (which reads on paragraph [0009]).

Regarding claim 4, Kransmo et al. discloses everything claimed, as applied above (see claim 2) additionally, Kransmo et al. discloses redirect instruction is generated after receipt of said text message and in dependence on a non-delivery criterion relating to the unavailability of a mobile station to receive said message (which reads on paragraph [0007]).

Regarding claim 5, Kransmo et al. discloses everything claimed, as applied above (see claim 1) additionally, Kransmo et al. discloses the text message is received at a message service center and the message service center obtains gateway address data from a database in dependence on the text message's destination address (which reads on paragraph [0032]), the gateway address data identifying a text message to email gateway (which reads on paragraph [0034]).

Regarding claim 6, Kransmo et al. discloses everything claimed, as applied above (see claim 5) additionally, Kransmo et al. discloses gateway obtains said email address from a database in dependence on said text message's destination address (which reads on paragraph [0037]).

Regarding claim 7, Kransmo et al. discloses everything claimed, as applied above additionally, Kransmo et al. discloses a gateway apparatus for a mobile telephone network, the

Art Unit: 2681

apparatus comprising: text message receiving means for receiving a text message (which reads on paragraph [0028]); address obtaining means for obtaining an email address in dependence on the destination address of a text message received by the text message receiving means (which reads on paragraph [0031]); and email means for forming an email from the text in a text message received by the text message receiving means and sending it to the address obtained for it by the address obtaining means (which reads on paragraph [0037]).

Regarding claim 8, Kransmo et al. discloses everything claimed, as applied above (see claim 7) additionally, Kransmo et al. discloses a gateway apparatus in combination with a database storing a mapping of text message destinations onto email addresses (which reads on paragraph [0029]), wherein the address obtaining means is configured to obtain email addresses from said mapping in said database (which reads on paragraph [0029]).

Regarding claim 9, Kransmo et al. discloses everything claimed, as applied above (see claim 1) additionally, Kransmo et al. discloses a method of operating a mobile phone network, the method comprising the steps of: recording an email address in association with a mobile phone number (which reads on the IMSI as disclosed in paragraph [0031]); (which reads on paragraph [0028]) addressed to said number (receiving a message addressed to said number, however, it is an inherent feature that in order to receive a call it would have to had been sent to the phone number associated with the unit); converting the text message into an email addressed to said email address (which reads on paragraph [0037]); and sending the email (which reads on paragraph [0037]).

Regarding claim 10, Kransmo et al. discloses everything claimed, as applied above (see claim 9) additionally, Kransmo et al. discloses receiving a redirect instruction associated with said mobile phone number (which reads on paragraph [0009]).

Regarding claim 11, Kransmo et al. discloses everything claimed, as applied above (see claim 10) additionally, Kransmo et al. discloses said redirect instruction is received from a subscriber in advance of said signal message (which reads on paragraph [0009])

Regarding claim 12, Kransmo et al. discloses everything claimed, as applied above (see claim 10) additionally, Kransmo et al. discloses redirect instruction is generated after receipt of said signal and in dependence on a non-delivery criterion relating to the unavailability of a mobile station to receive said signal message (which reads on paragraph [0009]).

Citation of Pertinent Prior Art

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Gupte et al. (U. S. Patent Publication Number 2002/0055350) apparatus and method of toggling between text messages and voice messages with a wireless communication device;

Wilson (GB Patent Number 2390956) telecommunications services apparatus;

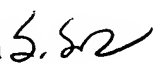

Art Unit: 2681

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sheila B. Smith whose telephone number is (703)305-0104. The examiner can normally be reached on Monday-Thursday 6:00 am - 3:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Erika Gary can be reached on 703-308-0123. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
